The repurpose described under this section mainly consists in enhancements of disclosures, aiming at better reflecting the investment process of the relevant Sub-Fund.

For the avoidance of doubt, this repurpose does not represent a material change to the investment strategy of the relevant Sub-Fund or its investment policy.

For the full characteristics of the Repurposed Sub-Fund please consult the Prospectus.

## 1.1 Fidelity Funds – Sustainable Global Equity Fund

<b>From:</b>	<b>To:</b>
<b>Fidelity Funds – Sustainable Global Equity Fund</b>	<b>Fidelity Funds – Sustainable Global Equity Income Fund</b>
<b>Investment Objective</b>	
<p>The fund aims to achieve long-term capital growth from a portfolio primarily made up of equity securities issued by companies throughout the world. As this fund may invest globally, it may be exposed to countries considered to be emerging markets.</p> <p>The fund is part of the Fidelity Sustainable Family of Funds and adopts a Sustainable Focused strategy under which a minimum of 90% of the fund's net assets will be analysed as to whether they maintain sustainable characteristics and a minimum of 70% of the fund's net assets will be invested in securities deemed to maintain sustainable characteristics, as described in the section entitled "1.3.2 (b) Fidelity Sustainable Family of Funds". The average ESG rating of the fund will exceed the average ESG rating of the fund's investment universe after the exclusion of 20% of the assets with the lowest ESG ratings.</p> <p>In addition, the Investment Manager will exclude investment in issuers having exposure to adult entertainment, fossil fuel exploration and extraction, alcohol, cannabis, gambling; thermal coal-based power generation; or fossil fuel-based power generation.</p> <p>The fund aims to have a lower carbon footprint compared to that of the MSCI ACWI Index (the "Index").</p> <p>The fund is actively managed. The Investment Manager will, when selecting investments for the fund and for the purposes of monitoring risk, reference the Index as its constituents are representative of the type of companies the fund invests in. The fund's performance can be assessed against its Index.</p> <p>The Investment Manager has a wide range of discretion relative to the Index. While the fund will hold assets that are components of the Index, it may also invest in companies, countries or sectors that are not included in, and that have different weightings from, the Index in order to take advantage of investment opportunities. It is expected that over long time periods, the fund's performance will differ from the Index. However, over short time periods, the fund's performance may be close to the Index, depending on market conditions.</p>	<p>The fund aims to achieve income and long-term capital growth from a portfolio primarily made up of equity securities issued by companies throughout the world. ## 1.1 Fidelity Funds – Sustainable Global Equity Fund

Shareholders' attention is drawn to the fact that the Index is not an index which integrates environmental and social considerations. Instead, the fund promotes environmental and social characteristics by adhering to the Fidelity Sustainable Family Framework, as described above.

The fund may invest its net assets directly in China A and B Shares.

Portfolio information:

Carbon footprint is defined as tonnes of CO2 emissions per \$1 million of sales.

The fund may invest its net assets directly in China A and B Shares.

Portfolio information:

The Investment Manager will actively select individual equity securities based on their potential to generate income and capital growth.

The Investment Manager is free to select equity securities of any company and is not restricted in its discretion to tactically allocate to any particular geographical region, industry sector or companies with a particular market capitalization if it believes that, relative to other equities, they may offer greater potential for income and capital growth.

Carbon footprint is defined as tonnes of CO2 emissions per \$1 million of sales.

### Investment Objective (notes)

#### Reference Ccy: USD

As the fund may invest globally, it may invest across different countries and regions. It is unconstrained in the amount it may invest in any single country or region.

The fund can directly invest in China A Shares through the QFI status of FIL Investment Management (Hong Kong) Limited and/or through any permissible means available to the fund under prevailing laws and regulations (including through the Stock Connect or any other eligible means). The fund will invest less than 30% of its net assets directly and/or indirectly in onshore China A and B Shares on an aggregated basis.

The fund is subject to the disclosure requirements of article 8 of the SFDR.

## 2.5 Fidelity Funds – Global Demographics Fund

The fund aims to achieve long-term capital growth from a portfolio primarily invested in equity securities of companies throughout the world that are able to benefit from demographics changes. Investments will include, but are not limited to, health care and consumer industries companies that stand to benefit from the effects of growing life expectancy in ageing populations, and the creation of wealth in emerging markets. Less than 30% of the fund's assets may be invested in emerging markets. Subject to the above, the Investment Manager is free to select any company regardless of size, industry or location and will concentrate its investment in a more limited number of companies and therefore the resulting portfolio will be less diversified.

A minimum of 50% of the fund's net assets will be invested in securities deemed to maintain sustainable characteristics, as described in the section entitled "1.3.2(a) Fidelity Sustainable Investing Framework" above.

The fund is actively managed. The Investment Manager will, when selecting investments for the fund and for the purposes of monitoring risk, reference MSCI ACWI Index (the "Index") as the Index constituents are representative of the type of companies the fund invests in. The fund's performance can be assessed against its Index. The Investment Manager has a wide range of discretion relative to the Index. While the fund will hold assets that are components of the Index, it may also invest in companies, countries or sectors that are not included in, and that have different weightings from, the Index in order to take advantage of investment opportunities. It is expected that over long time periods, the fund's performance will differ from the Index. However, over short time periods, the fund's performance may be close to the Index, depending on market conditions.

Shareholders' attention is drawn to the fact that the Index is not an index which integrates environmental and social considerations. Instead, the fund promotes environmental and social characteristics by adhering to the Fidelity Sustainable Investing Framework, as described above.

When selecting investments, the fund's investment universe will be reduced by at least 20% due to the exclusion of issuers on the basis of their ESG characteristics.

The fund is actively managed. The Investment Manager will, when selecting investments for the fund and for the purposes of monitoring risk, reference MSCI ACWI Index (the "Index") as the Index constituents are representative of the type of companies the fund invests in. The fund's performance can be assessed against its Index. The Investment Manager has a wide range of discretion relative to the Index. While the fund will hold assets that are components of the Index, it may also invest in companies, countries or sectors that are not included in, and that have different weightings from, the Index in order to take advantage of investment opportunities. It is expected that over long time periods, the fund's performance will differ from the Index. However, over short time periods, the fund's performance may be close to the Index, depending on market conditions.

Shareholders' attention is drawn to the fact that the Index is not an index which integrates environmental and social considerations. Instead, the fund promotes environmental and social characteristics by adhering to the Fidelity Sustainable Family Framework, as described above.

### Investment Objective

## 2.6 Fidelity Funds – Global Dividend Plus Fund

The fund aims to achieve income with the potential for some capital growth, investing at least 70% of net assets directly in equity securities of companies globally. The Investment Manager will target investments which it believes offer attractive dividend yields in addition to price appreciation.

As this fund may invest globally, it may be exposed to countries considered to be emerging markets.

As well as investing directly in equity securities, the fund will also achieve exposure indirectly through the use of derivatives. To enhance the income of the fund, derivatives may be used to generate additional income, for example, by the writing of covered call options on securities held by the fund, generating extra income in return for agreeing a strike price above which potential capital growth in a specified period is sold. The generation of additional income may impact the fund's potential for capital growth, particularly in periods of rapidly rising markets where capital gains may be lower when compared with an equivalent uncovered portfolio.

A minimum of 50% of the fund's net assets will be invested in securities deemed to maintain sustainable characteristics, as described in the section entitled "1.3.2(a) Fidelity Sustainable Investing Framework" above. The fund is actively managed and aims to provide income with the potential for some capital growth. Income will typically be in excess of MSCI ACWI Index (the "Index"). The Index constituents are representative of the type of companies the fund invests in. The fund's performance can be assessed against its Index.

The Investment Manager has a wide range of discretion relative to the Index. While the fund will hold assets that are components of the Index, it also is expected to invest in issuers, sectors, countries and security types that have different weightings from, and may not be included in, the Index in order to take advantage of investment opportunities. It is expected that over long time periods, the fund's performance will differ from the Index. However, over short time periods, the fund's performance may be close to the Index, depending on market conditions.

The fund may invest its net assets directly in China A and B Shares.

The Investment Manager is free to select equity securities of any company and is not restricted in its discretion to tactically allocate to any particular geographical region, industry sector or companies with a particular market capitalization if it believes that, relative to other equities, they may offer greater potential for income and capital growth.

## 2.9 Fidelity Funds – Strategic European Fund

<b>From:</b>	<b>To:</b>
<b>Fidelity Funds – Strategic European Fund</b>	<b>Fidelity Funds – Strategic European Fund</b>
<b>Investment Objective</b>	
<p>The fund aims to achieve long-term capital growth from a portfolio primarily made up of European securities, that comprises of three sub-components (each, a “Component”), as further described below.</p> <p>Component 1 is comprised of a ‘long only’ equity portfolio of European companies that the Investment Manager considers to be good quality businesses at attractive valuations. This component will represent 0-100% of the fund’s total net assets with the allocation driven by the availability of securities that meet the manager’s quality criteria.</p> <p>Component 2 is comprised of a global market neutral strategy which will be achieved through long and short positions in equities and related instruments (as further described below), as well as cash, cash equivalents, and Money Market Instruments. The Investment Manager will gain long exposure to those companies deemed attractive while maintaining short exposure to those companies deemed unattractive using a variety of instruments, including financial derivative instruments. Short exposure will only be achieved through the use of financial derivative instruments. The Component will typically have between -30% and 30% net equity exposure. Allocation to this Component will be 0-60% of the fund’s total net assets. The fund may invest its net assets indirectly in China A and B shares listed or traded on any Eligible Market in China as part of this Component.</p> <p>Component 3 is comprised of Euro denominated Money Market Instruments, reverse repurchase agreements and deposits. Allocation to this Component will be 0-50% of the fund’s total net assets. This limit excludes cash, cash equivalents, and Money Market Instruments exposure in the other Components.</p> <p>The Investment Manager will allocate assets between the three Components guided by opportunities and position sizing within the first European Equity long-only component. When Component 1 provides insufficient securities, in a waterfall approach, assets will be allocated to Component 2 and 3.</p>	<p>The fund aims to achieve long-term capital growth primarily through investments in European equities and equity related instruments, Euro denominated cash and instruments that may be readily converted to cash.</p> <p>The fund may invest up to 100% of its net assets in European equities and equity related instruments, and up to 50% of its net assets in cash and instruments that may be readily converted to cash.</p> <p>To achieve the fund’s objectives, the management process involves an investment allocation by the Investment Manager across three core investment strategies. These core strategies comprise a long equity strategy, a market neutral equity strategy and a cash allocation strategy.</p> <p>The long equity strategy is comprised of long equity positions in European companies that the Investment Manager considers to be good quality businesses at attractive valuations. The market neutral strategy is comprised of long and short equity or equity index futures positions in European companies. The Investment Manager will gain long exposure to those companies considered to be attractive while maintaining short exposure, through the use of derivatives, to those companies considered to be unattractive. The cash allocation strategy is comprised of Euro denominated cash and instruments that may be readily converted to cash (including cash deposits, treasury bills and government bonds, short-term corporate bonds, commercial paper, short term Money Market Instruments and certificates of deposit).</p> <p>The Investment Manager will allocate assets between the three strategies guided by the number of opportunities and position sizing within the long-only equity strategy. When this strategy provides insufficient securities, assets will be allocated to the market neutral equity strategy and/or the cash allocation strategy based on the attractiveness of risk adjusted returns and market conditions, with a preference for the market neutral equity strategy in typical market conditions.</p>

## 2.9 Fidelity Funds – Strategic European Fund

The largest ten holdings/securities held in the fund's portfolio may account for 50% or more of the fund's Net Asset Value, resulting in a reasonably concentrated portfolio.

The Investment Manager is not restricted in its choice of companies either by size or industry, and will choose investments largely determined by the availability of attractive opportunities. As this fund may invest globally via this Component, it may be exposed to countries considered to be emerging markets (including Russia).

The fund is actively managed and references the MSCI Europe Index (the "Index") for portfolio level risk measurement only as its global exposure is measured using the relative VaR approach. For the avoidance of doubt, the Investment Manager is not constrained by the Index and there are no restrictions on the extent to which the fund's performance may deviate from that of the Index.

**Portfolio information:**

In respect to Component 2:

Equity related instruments may include warrants, preference shares, rights issues, convertible bonds, depository receipts such as American Depository Receipts and Global Depository Receipts, equity linked or participation notes.

Financial derivatives instruments can be used to create market exposures through equity, currency, volatility or index related financial derivative instruments and include over-the-counter and/or exchange traded options, futures, contracts for difference (CFDs), equity linked notes, warrants, forward contracts, swaps, and/or a combination of the above.

At any time, the fund's portfolio may be concentrated in exposure to a limited number of companies accounting for more than 50% the fund's net assets. The Investment Manager is not restricted in its choice of companies either by size or industry and will choose investments largely determined by the availability of attractive opportunities.

The abovementioned update aims at enhancing the way the Sub-Funds are being managed, in light of latest investment opportunities considered appropriate by the Investment Manager.

Indeed, the opening of the onshore China capital market has been strongly pushed by the Chinese Government. With Bond-Connect, Stock Connect, CIBM, and other available investment instruments, the onshore China market has become more accessible by international investors, and a necessary building block in global asset allocation. Chinese equities and bonds are being gradually included in a number of indices by global index providers such as MSCI and Bloomberg. Given the growing importance of Chinese assets for global portfolios, it is intended to raise the current limits in a number of the Fidelity strategies.

While the overall risk profile of the relevant Sub-Funds will not change as a result of the change in the investment objective described above, investors should also note the risks associated with investment in China A and B Shares or onshore China fixed income securities as detailed in the Prospectus.

#### **b. Effective Date & Dealing Deadlines**

The changes described above will be effective on 14 July 2022.

You may switch or redeem your Shares on any Valuation Date until your usual dealing cut-off time on 13 July 2022 and the next calculated Net Asset Value per Share will apply. This period of free redemption or switch out prior to the effective date above will be at least one month after the date of this Notice. For the avoidance of doubt, you may still redeem or switch out your Shares at any time after the Dealing Request Deadline in accordance with the redemption or switching procedures, as the case may be, as set out in the Prospectus.

### **III. Increase of investments limits for certain Multi Asset Sub-Funds**

#### **c. Details of the Amendments**

The investment objective of those Sub-Funds set out below will be updated as indicated to reflect amended restrictions applicable to certain investments in order to meet changing client needs and aim to provide clients with superior outcomes.

The notes to the investment objective of certain of the abovementioned Sub-Funds will be updated to reflect the amended restrictions applicable to investment in China onshore securities.

#### **d. Effective Date & Dealing Deadlines**

The changes described above will be effective on 14 July 2022.

You may redeem or switch out your Shares free of charge on any Valuation Date from the date of this Notice until your usual dealing cut-off time on 13 July 2022 (the “**Dealing Request Deadline**”) and the next calculated Net Asset Value per Share will apply. This period of free redemption or switch out prior to the effective date above will be at least one month after the date of this Notice. For the avoidance of doubt, you may still redeem or switch out your Shares at any time after the Dealing Request Deadline in accordance with the redemption or switching procedures, as the case may be, as set out in the Prospectus.

## **4. OTHER SUB-FUND AMENDMENTS NOT SUBJECT TO A NOTICE PERIOD**

### **IV. Change to Fidelity Funds – China RMB Bond Fund**

With effect from 14 November 2022, the investment objective of Fidelity Funds – China RMB Bond Fund will be updated to reflect that the Sub-Fund aims to maximise total return over the long term by investing in RMB denominated debt, money market securities and cash and/or cash equivalents (including, amongst other things, time deposits).

In light of the currency exposure of this Sub-Fund, its Reference Currency will be modified from USD to CNH.

For the avoidance of doubt, the abovementioned updates do not represent a material change to the investment strategy of the Sub-Fund or its investment policy.

For operational purposes, and to ensure a smooth implementation of the change of Reference Currency of this Sub-Fund, subscriptions will be suspended during the Business Day preceding the Effective Date. For the avoidance of doubt, you may still redeem or switch out your Shares at any time, in accordance with the redemption or switching procedures, as the case may be, as set out in the Prospectus.

### **V. Change of name of certain Sub-Funds**

With effect from 14 July 2022, for consistency purposes, the Sub-Funds listed below will be renamed to better reflect the way they are currently being managed.

Current Name	New Name
Fidelity Funds – Japan Advantage Fund	Fidelity Funds – Japan Value Fund
Fidelity Funds – Japan Aggressive Fund	Fidelity Funds – Japan Growth Fund
Fidelity Funds – Sustainable Reduced Carbon Bond Fund	Fidelity Funds – Sustainable Climate Bond Fund

For the avoidance of doubt, the abovementioned updates do not represent a material change to the investment strategy of the Sub-Fund or its investment policy.

## VI. Replacement of reference index in certain Sub-Funds

With effect from 14 July 2022, the following Sub-Funds will change their reference index to better reflect the market within which the respective Sub-Funds operate.

Fund	From	To
<b>Fidelity Funds – Thailand Fund</b>	Bangkok SET Capped Index	Solactive GBS Thailand Investable Universe Index
<b>Fidelity Funds – Asian High Yield Fund</b>	ICE BofA Asian Dollar High Yield Corporate Index (Level 4 20% Lvl4 Cap, 3% Constrained)	J.P. Morgan Asia Credit Non-Investment Grade Index
<b>Fidelity Funds – Emerging Asia Fund</b>	MSCI Emerging Asia Composite Index	MSCI Emerging Markets Asia Index

For the avoidance of doubt, the abovementioned updates do not represent a material change to the investment strategy of the Sub-Funds or their investment policy.

Concerning Fidelity Funds – Thailand Fund, the update only aims at better reflecting the way the Sub-Fund is being managed. Indeed, the Solactive index follows a more similar index construction approach to e.g. MSCI and FTSE than the local stock exchange’s index does. It is part of a global family of indices following the same methodology and is hence is better for investors in this sense.

Concerning Fidelity Funds – Asian High Yield Fund, the update aims at better reflecting the income objective of the Sub-Fund or its allocation by ratings, sectors or countries. The current index is also not reflective of the current market given it excludes non-rated and sovereign bonds.

Concerning Fidelity Funds – Emerging Asia Fund, after having reconsidered the differences between the two indices, it has been determined that the standard index MSCI Emerging Markets Asia Index instead of the composite one MSCI Emerging Asia Composite Index should be disclosed as “reference index” of the Sub-Fund as it better reflects the market in which such Sub-Fund operates.
